

This Informed Consent Form refers to the use of the digital game **Jungle Dimensions**, which is currently made available to the public as a **digital product**.

All academic research stages previously associated with the development of the game have been duly completed and formally concluded, with their scientific objectives fully achieved and reported within the scope of a doctoral research project approved by a Research Ethics Committee. The current version of the game is no longer part of any research involving human subjects.

The purpose of this document is to clearly and transparently inform users about the types of data collected during the use of the product, as well as to explain the principles of privacy, confidentiality, and voluntariness associated with its use.

By proceeding to use the game, the user declares awareness of the information described herein and agrees with the terms presented.

INFORMED CONSENT FORM

1. Product Identification

This document refers to the digital game **Jungle Dimensions**, developed and published as an independent product intended for interactive entertainment on digital devices.

2. Purpose of Data Collection

During gameplay, **non-sensitive and non-identifiable** information related exclusively to the user's interaction with the system is collected.

Data collection serves the following purposes:

- Monitoring the technical performance of the application;
- Analyzing usage and navigation patterns to continuously improve user experience;
- Bug fixing, gameplay balancing, and functional evolution of the product.

There is no academic research purpose, clinical psychological assessment, or scientific investigation involving human subjects associated with the current data collection process.

3. Types of Data Collected

The collected data may include, but is not limited to:

- In-game navigation records;
- Interaction events with menus, levels, and features;
- Aggregated usage metrics, such as session duration and gameplay progression.

No sensitive personal data is collected, including but not limited to names, addresses, identification documents, biometric data, health-related information, or any data that allows direct identification of the user.

4. Data Storage, Processing, and Privacy

All collected data is stored securely, processed in an aggregated manner, and used exclusively for operational purposes and product improvement.

No data is shared with third parties for commercial, advertising, discriminatory, or any other purposes that could cause harm or discomfort to the user.

5. Risks and Benefits

Risks: No physical, psychological, or social risks associated with the use of the game or the described data collection have been identified.

Benefits: The use of collected data enables continuous product improvement, contributing to a more stable, balanced, and satisfying user experience.

6. Voluntary Participation and Right to Discontinue

Use of the game is entirely voluntary. The user may discontinue use at any time by closing or uninstalling the application, without any penalties or negative consequences.

7. Contact Information

If the user has any questions regarding the product or the data collection policy, they may contact the person responsible for development at:

Caio Felix de Araujo

E-mail: caio.felix.de.araujo@gmail.com

8. Consent

By using the game **Jungle Dimensions**, I declare that I have been clearly and adequately informed about the collection and use of data related to my interaction with the product. I acknowledge that such data is not collected for academic research purposes and does not allow for personal identification. I voluntarily agree to the terms described herein.

São Bernardo do Campo, November 1st, 2025.
